

The VISITOR CENTER MONTHLY

Telling the story of Lead's history, present, and future

Full STEAM Ahead

2021 STEAM Programming for Kids

-Leigha Patterson

By now most of you have heard about STEAM, but for those of you who haven't, STEAM is an acronym for - Science, Technology, Engineering, Art, & Math. There are two other ways in which this acronym has evolved starting with just STEM (no art) and including reading - turning it into (STREAM), but for now, we will just stick with STEAM. So, why do we tend to hear STEAM so often and why do these events revolve around kids? Well, 1) Children are our future, and 2) STEAM careers are top amongst desired and needed jobs across the globe. Put one and two together and you get the reason.

We have developed a series of kid related STEAM programming/classes from January to October 2021 and I am excited to be teaching them this year! These activities will be held once a month on the second Tuesday. Kids in grades K-5 will start at 4pm and grades 6-8 will start at 5pm. Parents do not need to be present, but always welcome to help chaperone and assist. Each month's activity will be the same, but adjusted according to age group. See the insert for more information on these upcoming events. Remember that Sanford Lab Homestake Visitor Center members get discounts. Punch cards are also available for these classes. We hope to see you and your kids there. Please contact Leigha for more STEAM information or to register - (605)584-3110 / leigha@sanfordlabhomestake.org and contact Thomas for membership / punch card information - (605)584-3110 / thomas@sanfordlabhomestake.org.

Call for Sponsors!

We're looking for corporate sponsors to support what we're doing here at the Visitor Center. If you'd like to be included please call and talk to Thomas (605)584-3110. Annual sponsorship includes many perks including free facility rentals!
